

青春献礼新时代 勇担使命创辉煌

青春，是一首激昂的赞歌，是一幅绚丽的画卷。在这个充满机遇与挑战的新时代，我们青年一代肩负着历史的重托，怀揣着梦想的火种，勇往直前，为创造辉煌的未来而努力奋斗。

新时代的号角已经吹响，我们站在历史的交汇点上，回望过去，展望未来。曾经的先辈们用他们的青春和热血，为我们铺就了一条通往光明的道路。如今，轮到我们接过这面旗帜，继续前行。我们深知，青春不仅是年华的代名词，更是责任与担当的象征。

在这个信息化、全球化的时代，我们面临着前所未有的机遇。科技的飞速发展，为我们提供了无限的可能。我们可以通过互联网，跨越时空的限制，与世界对话；我们可以通过创新，打破传统的束缚，开辟新的天地。机遇总是与挑战并存。全球化的浪潮也带来了激烈的竞争，我们需要不断提升自己，才能在时代的洪流中立于不败之地。

青春献礼新时代，意味着我们要有坚定的信念和远大的理想。理想是人生的灯塔，指引我们前进的方向。因此，我们要树立远大的目标，为之不懈奋斗。无论遇到多大的困难，都要保持初心，勇往直前。正如习近平总书记所说：“青年一代有理想、有本领、有担当，国家就有前途，民族就有希望。”

青春献礼新时代，还意味着我们要有扎实的本

领和过硬的素质。新时代呼唤的是复合型人才，因此我们要不断学习，努力提升自己的综合素质。无论是在专业知识的学习上，还是在实践能力的培养上，我们都应追求精益求精。唯有如此，我们才能在激烈的竞争中崭露头角，为社会发展贡献更大的力量。

青春献礼新时代，更意味着我们要有勇于担当的精神和无私奉献的情怀。新时代的辉煌成就，离不开我们每一个人的共同努力。因此，我们要勇于承担责任，积极参与社会建设，为国家的繁荣富强贡献自己的力量。无论是科技创新，还是社会服务，我们都应积极参与，以实际行动来诠释青春的价值与意义。

青春是一段美好的旅程，也是一段充满挑战的征程。在这个新时代，我们要珍惜青春，不负韶华，用智慧和汗水书写属于自己的辉煌篇章。让我们携手并肩，勇担使命，为实现中华民族的伟大复兴而努力奋斗！

青春献礼新时代，勇担使命创辉煌。这不仅是一句口号，更是一种信念、一种行动。让我们用青春的热情，点燃梦想的火炬，照亮前行的道路，共同创造一个更加美好的未来！

三联创始人金会庆教授参与研制的 又一国家标准获准发布

8月23日，国家市场监督管理总局、国家标准化管理委员会发布中华人民共和国国家标准公告（2024年第17号），三联创始人金会庆教授作为主要起草人参与编制的国家标准《轮椅车 第30部分：改变乘坐者姿势的轮椅车测试方法和要求》（GB/T 18029.30-2024）获准发布。该标准是金会庆教授继《机动车驾驶员身体条件及其测评要求》

（GB 18463-2001）后再次作为主要成员参与起草的又一国家标准。

国家标准《轮椅车 第30部分：改变乘坐者姿势的轮椅车测试方法和要求》规定了能在正常使用时由乘坐者或护理者操作、用手动或电动方式改变乘坐者姿势的手动和（或）电动轮椅车的测试方法及安全和性能要求；还规定了需要评估轮椅车可调节范围配置的不同功能和强度测试。标准的发布将提高下肢功能障碍者和出行不便的老年人的乘坐轮椅的舒适度、独立性和生活质量，尤其有助于交通事故致伤致残的伤情康复及健康改善。

该标准的发布是金会庆教授团队在现代康养产业的一项重要成果，也是三联产教深度融合，推进科技成果转化的成功案例。作为集产、学、研于一体的民营科教集团，三联始终以安徽省战略性新兴产业发展需求为导向，持续发挥产学研一体化优势，加强康养产业纵深发展，为建设健康中国贡献力量。

安徽三联学院王飞教授团队在多个国际权威期刊 发表高水平论文

近日，安徽三联学院王飞教授团队在新型红色荧光材料领域研究取得新进展，相关研究成果分别公开发表在SCI国际权威期刊《Ceramics International》（TOP期刊）、《Journal of Alloys and Compounds》（TOP期刊）、《Dalton Transactions》《Inorganic Chemistry Communications》和《Journal of the American Ceramic Society》，且均为JCR一区。其中在《Dalton Transactions》（2024, 53, 12465）发表的论文“Fluorescence properties of novel deep-red phosphor $\text{LiMg}_4\text{SbO}_7:\text{Mn}^{4+}$ with excellent quantum yield and color purity”被期刊选为正面封面论文进行报道。安徽三联学院均为第一作者单位和第一通讯单位。

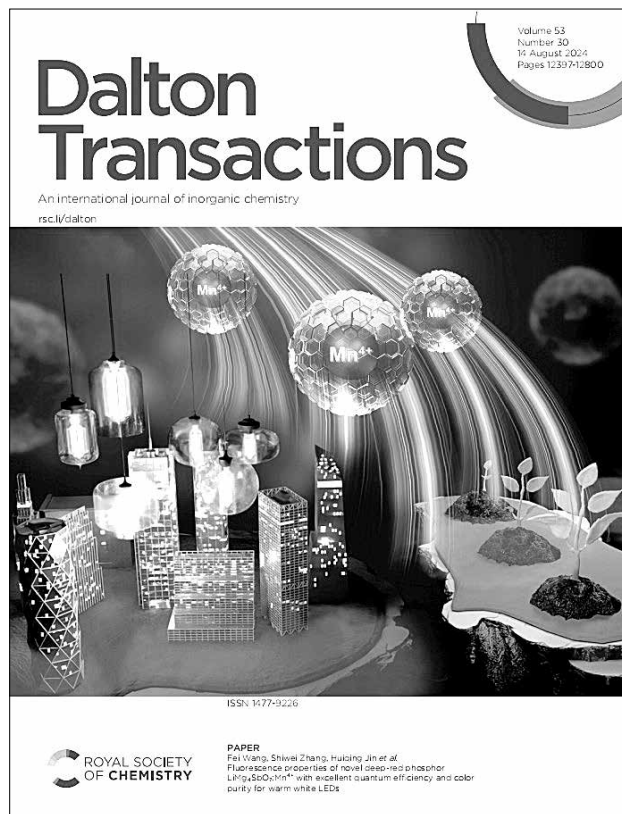

在该项研究中，通过高温固相法合成了一种新型深红色荧光材料 $\text{LiMg}_4\text{SbO}_7:\text{Mn}^{4+}$ ，该荧光材料表现出惊人的量子产率（ $\text{QY}=98.71\%$ ）和色纯度（ $\text{CP}=100.89\%$ ）。因此，该荧光材料在显示器的背景光和LED照明领域具有巨大的应用价值。

系列研究围绕以 Eu^{2+} 、 Eu^{3+} 和 Mn^{4+} 为发光中心，以硅酸盐和锑酸盐为基质的新型红色荧光材料，该系列新材料具有发光效率高、显色性好和热稳定性优异等优点，可以广泛应用于交通安全信息显示、照明、背景显示和植物生长照明等诸多领域。

王飞教授团队的相关研究成果，不仅是安徽三联学院在科研创新领域取得的重大突破，更是学校重视科研团队引育和科研成果孵化的重要体现。展望未来，安徽三联学院将继续秉承“产学研”基因，加强高层次人才队伍建设，提升自主创新能力，力争在更多领域取得突破性成果，为推动科技进步和社会发展贡献力量。

“芒”有所得 种有所获

时雨尽收，四野极静。青云红墙影动，隙光点点，像酝酿着什么。奔跑着的月亮悄悬，正播种着一场日出。我行其野，芄芄其麦。四季物语，长乐未央。芒种，带着太阳的光芒，驾长车，走在岁月更迭的路上。

风吹麦成浪，蝉鸣夏始忙。南风之薰，吹来麦穗的清香。农人们争分夺秒地抢收，银镰闪动，汗珠在古铜色的脊背上流淌，太阳底下，闪烁着成熟饱满的一穗穗麦子的光芒。此刻，不禁想起白香山的诗句，“田家少闲月，五月人倍忙。”芒种插秧谷满尖，佳酿飘香满人间。

作为麦田的守望者，乡愁无边，底色橙黄。罗中立《父亲》的油画，倏忽在眼前浮现，那张布满一道道沧桑的面庞，像阡陌纵横的田畴阔野，如斯苍茫。从“一分耕耘一分收获”的生活逻辑，到“春种一粒粟，秋收万颗子”的丰厚回报，又到“锄禾日当午，汗滴禾下土”的艰辛执着，无不诠释着劳动最美的精神内涵，无不传递着耕耘未来的淳朴道理。

种什么样的种子，收获什么样的果实，没有一次努力会被辜负。自古以来，蕴藏在奋进里的哲思哲学，总是令人热血沸腾、张力四射。诸如，“天行健，君子以自强不息”的坚持不懈，仿佛看到翻山越岭、无远弗届的奋斗之姿；再如，“潮平两岸

阔，风正一帆悬”的乘势而为，似乎见证勇立潮头、拼搏进取的雄心壮志；又如，“士不可以不弘毅，任重而道远”的谆谆嘱托，一直激励着挺拔笔直、步履铿锵的伟岸英魂……奋斗之志，进取之心，穿越历史回响，透射的精神光芒历久弥新。

芒种，又逢高考，似乎多了一份更为虔诚的力量。高考是青春赛场的跑道，每个人都想赢在“第一步”，为今后的辉煌换取一种可能。芒种，象征劳作与回报的哲理，正与高考承载梦想和奋斗的本质一致。锋“芒”毕露，“种”下希望，学子以笔为剑，刻下“十年寒窗”的轨迹，写照日积月累的知识力量，为明日启航埋下坚实的伏笔。芒种的意义，与高考相遇，似乎得到了升华和进阶。忽而芒种碧满天，满汀少年花，一声令下掀起潮浪万尺，一滴墨落尽染青山万峰。

芒种，是收获也是播种，是告别也是启程，是结束也是希望。时令不饶人，岁月不可追，田里的庄稼要及时耕作，心中的梦也不能落空，趁时而种，不负时光。人生要忙而不是茫，要追逐太阳的光芒，也要心有所向奔赴所爱，成为自己的光芒，金穗的锋芒，恰逢少年盈收炙热的理想。行到安定时，自有光芒万丈！

Professor Jin Huiqing, Founder of Sanlian, Contributes to the Development of Another National Standard Approved for Release

On August 23, the General Administration of Market Supervision and the National Standardization Management Committee of China published the National Standard Announcement (2024 No. 17). Professor Jin Huiqing, founder of Sanlian, participated as a primary drafter in the preparation of the national standard “Wheelchairs – Part 30: Test Methods and Requirements for Wheelchairs that Change the Seating Posture of the User” (GB/T 18029.30–2024), which has now been approved for release. This new standard marks another important achievement following Professor Jin’s contribution to the standard “Physical Conditions and Evaluation Requirements for Motor

Vehicle Drivers” (GB 18463–2001).

The “Wheelchairs – Part 30” standard outlines the test methods and safety and performance requirements for manual and/or electric wheelchairs that allow the user or caregiver to adjust the user’s posture either manually or electrically. The standard also specifies tests for the adjustable range, configuration functions, and strength of these wheelchairs. The implementation of this standard is expected to significantly enhance the comfort, independence, and quality of life for individuals with lower limb disabilities and the elderly, particularly aiding in rehabilitation and health improvement for those injured or disabled in traffic accidents.

This milestone is a significant contribution from Professor Jin Huiqing’s team to the modern health care industry and exemplifies Sanlian’s deep integration of production, education, and research. Sanlian continues to focus on the strategic needs of Anhui Province’s emerging industries, leveraging the advantages of the integrated approach to contribute to the development of a healthier China.

Professor Wang Fei' s Team at Anhui Sanlian University Publishes High-Level Papers in Multiple International Authoritative Journals

Recently, Professor Wang Fei' s team at Anhui Sanlian University has made new progress in the research of novel red fluorescent materials. Their research findings have been published in several SCI international authoritative journals, including Ceramics International (TOP journal), Journal of Alloys and Compounds (TOP journal), Dalton Transactions, Inorganic Chemistry Communications, and Journal of the American Ceramic Society, all of which are in JCR Zone 1. Notably, the paper titled “Fluorescence properties of novel deep-red phosphor $\text{LiMg}_4\text{SbO}_7:\text{Mn}^{4+}$ with excellent quantum yield and color purity,” published in Dalton Transactions (2024, 53, 12465), was selected as a featured cover paper by the journal. Anhui Sanlian University is recognized as both the first author unit and the first corresponding unit in all these publications.

In this research, a novel deep-red fluorescent material $\text{LiMg}_4\text{SbO}_7:\text{Mn}^{4+}$ was synthesized using a high-temperature solid-state method. This fluorescent material exhibits an astonishing quantum yield (QY=98.71%) and color purity (CP=100.89%). Therefore, this fluorescent material has significant application potential in background lighting for displays and LED lighting.

The series of studies focuses on new red fluorescent materials with Eu^{2+} , Eu^{3+} , and Mn^{4+} as luminescent centers, using silicates and antimonates as matrices. These new materials exhibit high luminescence efficiency, excellent color rendering, and remarkable thermal stability, making them suitable for a wide range

of applications, including traffic safety information displays, lighting, background displays, and plant growth lighting.

The research achievements of Professor Wang Fei' s team not only represent a major breakthrough for Anhui Sanlian University in the field of scientific research innovation but also reflect the university' s emphasis on nurturing research teams and incubating research outcomes. Looking ahead, Anhui Sanlian University will continue to uphold its “industry–university–research” ethos, strengthen the construction of high-level talent teams, enhance its independent innovation capabilities, and strive to achieve

breakthrough results in more fields, contributing to technological progress and social development.

Cultivating an Innovative Ground for Talent

——Achievements of the National Postdoctoral Programme at Anhui Sanlian Group

The Postdoctoral Programme at Anhui Sanlian Group (hereinafter referred to as “the Programme”) was established in March 2001 and is one of the

earliest national-level programmes approved in Anhui Province. It is also the first postdoctoral research station set up in a private high-tech enterprise in Anhui Province. Since its inception, under the leadership of Professor Jin Huqing, the founder of Sanlian and the head of the Programme, it has closely aligned with the development strategy of Anhui Sanlian Group in accordance with the requirements of various levels of supervisory departments. By fully utilizing high-tech platforms such as the “National Center for Vehicle Driving Safety Engineering Technology,” which is

uniquely established in the industry and supported by the Ministry of Science and Technology, the Programme conducts research in the field of traffic safety, enhancing the scientific and technological level in this area and providing vital support for relevant policy formulation and practical applications. In July 2020, the Programme successfully passed the comprehensive evaluation by the Ministry of Human Resources and Social Security and the National Postdoctoral Management Committee.

The Programme continuously innovates its management methods for postdoctoral work, improves and enriches the training mechanism, enhances peer exchange, and expands project collaboration, thereby providing excellent conditions and comprehensive support for researchers. As a result, relevant research achievements have consistently yielded innovations and breakthroughs. Currently, there are four postdoctoral researchers in the Programme who have successively undertaken key research projects, including “Controlled Preparation, Luminescence Performance, and Application Research of Novel Eu²⁺/Eu³⁺ Doped Silicate-based Luminescent Materials” funded by Anhui Province, and “Design Synthesis, Performance, and Application Research of Novel Apatite Structured Silicate Red Phosphors” funded by Hefei City, as well as several important projects such as “The Impact of Driving Behavior Tendencies on Motion Planning in

Autonomous Driving Systems” and “Analysis of the Willingness of the Elderly for Institutional Elderly Care and Its Influencing Factors.” Additionally, they have hosted or participated in multiple research tasks for the Group, such as the project “Technological Innovation and Application for Safe Driving of Operational Vehicles,” which won the First Prize in Science and Technology from the China Highway Society of the Ministry of Transport, and the standard for “Driving Operation Specifications for Road Passenger and Freight Transport Drivers” (JT/T1143–2017), which received a provincial science and technology award of 400,000 yuan. According to incomplete statistics, the postdoctoral researchers at the Programme have published over 30 high-quality papers and obtained more than 10 authorized invention patents, generating economic benefits exceeding 23 million yuan.

Looking ahead, the Programme will uphold the Group’s integrated development strategy of industry, academia, and research, further leveraging the advantages of postdoctoral researchers in scientific innovation and talent cultivation, promoting the upgrade and development of the Group’s related industries, and making positive contributions to regional economic development.
